# Section 1: Prevention Management

## KEY PRINCIPLES

The following principles should be applied to communicable disease prevention and management in schools:

- Aligning communicable disease prevention measures with public health guidance to support student and staff wellness.
- Using an inclusive and trauma-informed lens, with a focus on mental health and wellness.
- Focusing supports to address unique student and staff needs, recognizing the different impacts that communicable diseases may have on individuals and communities.
- Consulting and working with First Nations, Métis, and Inuit peoples to address the unique educational and learning needs of their communities.
- Engaging and collaborating with parents/caregivers, staff, unions and community partners to develop local solutions when needed.
- As required by [WorkSafeBC](#), all boards of education, independent school authorities and schools must ensure the health of their workers by ensuring steps are taken to reduce the risk to workers from communicable diseases.
- The Provincial Health Officer or local Medical Health Officers may issue temporary provincial, regional or local recommendations or orders of additional prevention measures during times of increased communicable disease risk.

## INDIGENOUS STUDENTS (First Nations, Métis and Inuit)

### First Nations Students Living on Reserve

First Nations have the authority to declare states of emergency and have responsibility for the education of their citizens. In the spirit of Reconciliation and consistent with the *Declaration on the Rights of Indigenous Peoples Act*, boards of education and independent schools (*excluding First Nations independent schools*) are expected to engage with First Nations communities who have First Nation students living in community (*on-reserve*) enrolled in the school district/school as soon as possible to discuss school plans for upcoming school years. This will help to identify potential accommodations needed to support students who may not attend in-person classes.

First Nations may take increased safety measures to manage communicable diseases in their communities. This may mean that some First Nations learners will not attend in-person classes.

### Indigenous Student Success and Achievement

Boards of education and independent school authorities are expected to continue to support equitable outcomes and opportunities for all Indigenous learners by maintaining Indigenous student supports and collaboration with Indigenous communities and education partners. Boards/authorities are expected to collaborate with local First Nations, Métis Chartered communities, and Indigenous communities on any changes/updates to the delivery of any programs including "Indigenous language and culture programs, Indigenous support services, and other approved Indigenous programs.

Communicable disease outbreaks and pandemics have disproportionate impact on Indigenous communities. Boards/authorities should identify Indigenous students whose educational outcomes may be negatively impacted during periods of increased risk in communities and make accommodations to ensure these students are supported. The needs of Indigenous students who require additional supports should be planned for and prioritized in partnership with parents/caregivers and communities.

As per the [BC Tripartite Education Agreement \(BCTEA\)](#), Boards of Education are also expected to engage with First Nations to identify the transportation needs of First Nation students living on reserve. Collaboration between boards and First Nations is necessary to ensure there are equitable and safe transportation opportunities for students.

Additional considerations for boards/authorities include:

- Collaboration between educators and Indigenous support staff on the development of Indigenous students' learning plans, including ensuring the integration of language and culture into these plans.
- Awareness and sensitivity regarding the complex and devastating history that pandemics have had on many Indigenous communities.
- Understanding that some Indigenous families and communities may continue to take increased safety measures, which may mean that some students will not attend in-person instruction during periods of increased risk in communities.

### Communication

Boards/authorities have an obligation to inform and communicate with the First Nations they serve regarding learning plans for Nominal Roll students, Enhancement Agreement goals, Local Education Agreements, Joint Transportation Plans and Equity in Action Plans.

Boards/authorities are expected to inform and communicate with the local Métis Chartered communities regarding the learning plans, Enhancement Agreement goals and Equity in Action Plans for Métis students.

### **TRAUMA-INFORMED PRACTICE**

Trauma-informed practice is a compassionate lens of understanding what is helpful to all children, youth and adults, especially those who have experienced traumatic events. Trauma-informed practice includes:

- Providing inclusive and compassionate learning environments.
- Understanding coping strategies.
- Supporting independence.
- Helping to minimize additional stress or trauma by addressing individual needs of students and staff.

Educators and support staff should be aware of changes in student behavior, including trauma-related behaviors which may include fear, hyperactivity, aggression, body aches and pain, depression, self-harming behaviours, excessive shyness, or withdrawal. To support educators and staff in identifying and responding to the needs of students who have experienced trauma, the Ministry has created [trauma-informed practice resources](#) that are available on the [erase \(Expect Respect and a Safe Education\) website](#).

## Section 2: Communicable Disease Prevention Guidance

This section:

- Outlines the recommended measures K-12 schools should have in place to reduce the risk of transmission of communicable disease, as determined by the BC Centre for Disease Control and Ministry of Health (public health).
  - Public health guidance is included in boxes outlined below, and is available in the [Public Health Communicable Disease Guidance for K-12 Schools](#).
- Provides additional implementation guidance to support schools in developing and reviewing their communicable disease prevention plans.

### SUPPORTIVE SCHOOL ENVIRONMENTS

Schools can be supportive environments for communicable disease prevention by:

- Having staff model personal practices (e.g., hand hygiene, respiratory etiquette), and assist younger students as needed.
- Sharing reliable information, including from the BC Centre for Disease Control, Office of the Provincial Health Officer, and local health authorities and First Nations Health Authority to parents, families and caregivers.
- Promoting personal practices in the school (e.g., posters).
- Ensuring individual choices for personal practices (e.g., choosing to wear a mask or face covering) are supported and treated with respect, recognizing varying personal comfort levels.

### VACCINES

#### *BCCDC Guidance*

Vaccines are important tools to protect against serious outcomes of many communicable diseases, such as COVID-19 and influenza. Students and staff are encouraged to ensure they are up to date [on all recommended vaccines for communicable diseases](#).

Schools are encouraged to share evidence-based information and promote opportunities to be vaccinated in partnership with public health and the local medical health officer. For administrators and staff, more information on vaccination and communicable disease prevention in the workplace is available in the [Work Safe B.C.](#) website. Evidence-based immunization information and tools for B.C. Residents are available from [BCCDC](#) and [ImmunizeBC](#) websites.

The [Support Services for Schools Order](#) and the [Inter-Ministerial Protocols for the Provision of Support Services to Schools](#) require boards of education and participating independent school authorities to provide a designated space in each school for public health nurses or other qualified health personnel to carry out their duties (including immunizations).

### WorkSafeBC – Communicable Disease Prevention

School boards and independent school authorities must follow WorkSafeBC guidance and must provide communication, training and orientation to ensure the health and safety of their workers. WorkSafeBC

communicable disease prevention guidance is aligned with the guidance provided by BCCDC. Please see their website for specific requirements and additional information.

## Communicable Disease Prevention Plans

Communicable disease prevention plans focus on reducing the risk of transmission of communicable diseases. Schools are expected to document and make their plans readily available (e.g., post on school/school district websites, on a bulletin board at the school, etc.).

The prevention measures outlined below should always be in place. During times of increased communicable disease risk, public health may recommend additional prevention measures for schools to implement. Communicable disease prevention plans should be updated when temporary additional measures are in place.

School districts, independent school authorities and schools should review their communicable disease prevention plans when these guidelines are updated, on an annual basis or as circumstances require and should do so with their Site Committees and Joint Health and Safety Committees. Reviews should address areas where there are identified gaps in implementation.

### EMERGENCY AND EVACUATION DRILLS

Emergency and evacuation planning, and drills should consider communicable disease prevention plans. In the event of an actual emergency, communicable disease prevention measures can be suspended to ensure for a timely, efficient, and safe response.

## Environmental Practices

### CLEANING AND DISINFECTION

#### *BCCDC Guidance*

Regular cleaning and disinfection can help prevent the spread of communicable diseases. Cleaning of frequently touched surfaces should occur in line with regular practices and when visibly dirty.

As part of sustainable communicable disease management, schools are encouraged to maintain and incorporate enhanced cleaning and disinfecting practices, whenever feasible.

- **General Cleaning**
  - Regular practices should include general cleaning of the premises.
- **Products and Procedures**
  - For **cleaning**, use water and detergent (e.g., liquid dishwashing soap), or common, commercially available products, along with good cleaning practices. For hard-to-reach areas, use a brush and rinse thoroughly prior to disinfecting.

- For **disinfection**, use common, commercially available disinfectants. [Health Canada](#) provides information about products with evidence for use against specific communicable diseases that may be useful in selecting products.
- Follow these procedures when cleaning and disinfecting:
  - Always wash hands before and after handling shared objects.
  - Items and surfaces that a person has placed in their mouths or that have been in contact with bodily fluids should be cleaned as soon as possible and between uses by different people.
  - A dishwasher can be used to clean and sanitize dishwasher-safe items if the sanitize setting is used with adequately hot water. Regular practices should include general cleaning of the premises.
- **Frequently Touched Surfaces and Shared Use Items**
  - Cleaning and disinfection of frequently touched surfaces should occur at least once in a 24-hour period and when visibly dirty.
  - Frequently touched surfaces are items touched by larger numbers of students and staff. They can include doorknobs, light switches, hand railings, water fountains and toilet handles, as well as shared equipment (e.g., computer keyboards, PE/sports and music equipment), appliances (e.g., microwaves) and service counters (e.g., library circulation desk), and may change from day to day based on utilization.
  - Frequently touched items like toys or manipulatives that may not be able to be cleaned often (e.g., fabrics) or at all (e.g., sand, foam, playdough, etc.) can be used. Carpets and rugs (e.g., in Kindergarten and StrongStart classes) can also be used.
  - Proper hand hygiene should be practiced before and after shared equipment use. Equipment that touches the mouth (e.g., instrument mouth pieces, water bottles, utensils) or has been in contact with bodily fluids should not be shared unless cleaned and disinfected in between uses.

Cleaning and disinfection activities should focus on spaces that have been utilized by staff or students.

- **Cleaning and Disinfecting Bodily Fluids**
  - Follow these procedures, in conjunction with school/district policies, when cleaning and disinfecting bodily fluids (e.g., runny nose, vomit, stool, urine):
    - Wear disposable gloves when cleaning blood or body fluids.
    - Wash hands before wearing and after removing gloves.
    - Follow regular health and safety procedures and regularly used PPE (e.g., gloves, protective or woven sleeves) for blood and bodily fluids (e.g., toileting, spitting, biting).

## VENTILATION AND AIR EXCHANGE

### *BCCDC Guidance*

Continue to ensure all mechanical heating, ventilation and air conditioning (HVAC) systems are designed, operated, and maintained as per standards and specifications for ongoing comfort of workers ([Part 4 of the OHS Regulation](#)), and that they are working properly. Windows may be opened when the weather permits if it does not impact the functioning of the ventilation systems.

It is important to think of HVAC systems holistically, factoring in both outdoor air supply and filtration. The combination of outdoor air supply and filtration can significantly influence indoor air quality. School districts and independent school authorities should regularly maintain HVAC systems for proper operation. Schools should consider guidance for school ventilation systems offered by [ASHRAE](#). This includes considering:

- Schools with recycled/recirculated air systems should consider upgrading filters to finer grain filters such as MERV 13 (if possible).
- Increasing air exchanges by adjusting the HVAC system.
- Managing air distribution through building automation control systems.
- Where possible, opening windows if weather permits and HVAC system function will not be negatively impacted.

School district and site-based plans should include provisions for when a school/worksite's ventilation system is temporarily compromised (e.g., partial power outage, ventilation break down).

When using air conditioners and fans in ventilated spaces, air should be moved from high places to lower places instead of blowing air directly from one person's breathing zone to another's. Avoid horizontal cross breezes.

Natural ventilation (operable windows, etc.) and portable HEPA filter units can be considered in regularly occupied classrooms that do not have mechanical ventilation systems.

Use of portable air conditioners and fans in unventilated spaces with doors and windows closed should be avoided, except when necessary (e.g., during high or excessive heat events). Schools are encouraged to use BCCDC resources, including on [Heat Event Response Planning](#) and [Wildfire Smoke](#), in planning for excessive heat events, and to consult their local health authority for guidance as needed.

## HAND HYGIENE

### *BCCDC Guidance*

Rigorous hand washing with plain soap and water or using an [effective hand sanitizer](#) reduces the spread of illness. Everyone should practice diligent hand hygiene and schools should facilitate regular opportunities for students and staff to wash their hands.

To learn about how to perform hand hygiene, please refer to the BCCDC's [hand hygiene poster](#).

Schools should:

- Facilitate regular opportunities for hand hygiene:
  - This can include using portable hand-washing sites and/or alcohol-based hand sanitizer dispensers containing at least 60% alcohol
    - Schools should use [commercial hand sanitizer products that have met Health Canada's requirements and are authorized for sale in Canada](#).
- Ensure hand hygiene supplies are always well stocked including soap, paper towels (or air drier) and where appropriate, alcohol-based hand rub with minimum of 60% alcohol.
- If hands are visibly soiled, alcohol-based hand sanitizer may not be effective at eliminating microbes. Soap and water are preferred when hands are visibly dirty. If it is not available, use an alcohol-based hand wipe followed by alcohol-based hand rub.

## RESPIRATORY ETIQUETTE

### *BCCDC Guidance*

Parents and staff can teach and reinforce good respiratory etiquette practices among students, including:

- Cough or sneeze into their elbow or a tissue. Throw away used tissues and immediately perform hand hygiene.
- Refrain from touching their eyes, nose, or mouth with unwashed hands.
- Refrain from sharing any food, drinks, unwashed utensils, cigarettes, or vaping devices.

## Administrative Practices

### HEALTH AWARENESS AND WHAT TO DO WHEN SICK

#### *BCCDC Guidance*

School administrators should ensure that staff, other adults entering the school, parents, caregivers, and students are aware that they should not come to school if they are sick and unable to participate fully in routine activities. School administrators can support this practice by communicating the importance of not attending school if sick and unable to participate fully in routine activities.

A health check means a person regularly checking to ensure they (or their child) are not experiencing symptoms of illness that would limit their ability to participate fully in regular activities before coming to school to prevent spread of communicable diseases within the school settings. Schools do not need to monitor students or staff for symptoms of illness.

Staff, students, or other persons in the school setting who are exhibiting symptoms of illness, such as respiratory illness, should stay home until they are well enough to participate in regular activities or otherwise advised by a healthcare provider. Those experiencing certain illnesses, such as gastrointestinal illness caused by norovirus, may be advised to stay home for longer. Staff, children, or other persons can attend school if their symptoms are consistent with a previously diagnosed health condition (e.g., seasonal allergies) or symptoms have improved, and they feel well enough to return to regular activities. If you are unsure or concerned about your symptoms, connect with your health care provider or call 8-1-1.

School administrators should ensure that everyone entering a school is aware and routinely reminded of their responsibility to practice health awareness, including that they should not come to school if they are sick. This can be supported through communications (e.g., emails/letters to parents and staff), orientation activities (e.g., meetings, videos) and other reminders (e.g., signage on doors).

Schools should not require a health care provider note (i.e., a doctor's note) to confirm the health status of any individual, beyond those required to support medical accommodation as per usual practice.

## WHAT TO DO WHEN SICK AT SCHOOL/WORK

### *BCCDC Guidance*

If a staff member, student, or other person develops symptoms of illness at school and is unable to participate in regular activities, they should be supported to go home until their symptoms have improved or otherwise advised by a healthcare provider. Appropriate infection control precautions should be taken while the person is preparing to leave the school premises, including use of appropriate hand hygiene and cleaning/disinfection of surfaces soiled with bodily fluids. They may use a mask if they are experiencing respiratory symptoms.

School administrators should also establish procedures for students and staff who become sick while at school/work.

- Continue to have non-medical masks on hand for those who have forgotten theirs but would like to wear one (for both the person who is sick and for those who may be assisting them).
- Make arrangements for the student/staff to go home as soon as possible (e.g., contact student's parent/caregiver for pick-up).
- Schools should have a space available where the student or staff can wait comfortably for pick-up and are separated from others.
  - Younger children must be supervised when separated. Supervising staff can wear a mask, should avoid touching bodily fluids as much as possible and practice diligent hand hygiene.
- Staff responsible for facility cleaning should clean and disinfect the surfaces/equipment which the person's bodily fluids may have been in contact with while they were ill (e.g., their desk in a classroom, the bathroom stall they used, etc.) prior to the surfaces/equipment being used by others. Cleaning/disinfecting the entire room the person was in (a "terminal" clean) is not required in these circumstances.
- Request that the individual stay home until symptoms have improved and they feel well enough to participate in all school-related activities.

## SUPPORTING STUDENTS WITH DISABILITIES/DIVERSE ABILITIES AND/OR RECEIVING HEALTH SERVICES

### *BCCDC Guidance*

Staff and those providing services to students with medical complexity, immune suppression, receiving direct or delegated care, or with disabilities and diverse abilities who are in close proximity to a child should follow routine infection control practices and care plans for the child, if applicable.

Schools should implement communicable disease prevention measures that promote inclusion of students with disabilities/diverse abilities.

In-class instruction may not be suitable for some children (or families) with severe immune compromise or medical complexity, which should be determined on a case-by-case basis with a medical care provider. Schools should follow regular practices for those needing alternative learning arrangements due to immune compromise or medical complexity to ensure access to learning and supports.

Those providing health services that require being in close proximity to a student should follow the student's individual care plan (if one is in place) and their standard risk assessment methods to determine what PPE is needed for communicable disease prevention (e.g., gloves for toileting).

Schools should continue to have non-medical masks on hand for those who have forgotten theirs but would like to wear one.

## SPACE ARRANGEMENT

### *BCCDC Guidance*

In learning environments, schools can use classroom and learning environment configurations and activities that best meet learner needs and preferred educational approaches.

## TRANSPORTATION

### *BCCDC Guidance*

For school buses, schools should implement the prevention measures included in the [BCCDC Public Health Communicable Disease Guidance for K-12 Schools](#), where applicable.

Buses used for transporting students should have communicable disease prevention measures in place in line with those in place in the school, and/or as applicable.

## VISITORS AND COMMUNITY USE OF SCHOOLS

### *BCCDC Guidance*

Schools can follow normal practices for welcoming visitors and the community use of schools.

Visitors, including community groups using the school, should follow applicable communicable disease prevention measures outlined in this document.

## GATHERINGS AND EVENTS

### *BCCDC Guidance*

School extracurricular and social gatherings and events (including those occurring within and between schools), regardless of location, can occur in line with the [BCCDC Public Health Communicable Disease Guidance for K-12 Schools](#).

School gatherings and events should have communicable disease prevention measures in place in line with those in place in the school.

## CURRICULUM, PROGRAMS AND ACTIVITIES

Schools should implement communicable disease prevention practices (e.g., cleaning and disinfecting, hand hygiene, respiratory etiquette) specific to the activity.

## FIELD TRIPS/TRADES IN TRAINING/WORK EXPERIENCE PROGRAMS

Students enrolled in individual training/work experience programs should follow the communicable disease prevention plan required by the workplace/facility or the field trip venue. Classes (or other similar groupings of students) participating in training/work experience programs or field trips should follow the more stringent measures (if applicable) between the school and the workplace/facility/field trip destination's communicable disease prevention plans.

## Personal Practices

### HEALTH AWARENESS, HAND HYGIENE AND RESPIRATORY ETIQUETTE

Everyone at school should practice [health awareness](#) (including staying home when sick), [hand hygiene](#) and [respiratory etiquette](#).

### MASKS AND FACE COVERINGS

#### *BCCDC Guidance*

The decision to wear a mask is a personal one, based on individual preference. Some students and staff may choose to continue to wear a non-medical mask or face covering throughout the day or for certain activities.

The choice of staff and students to choose whether they practice additional personal prevention measures should be respected. Information on non-medical masks is available from [BCCDC](#).

Masks are one layer of protection used to prevent the spread of communicable disease. To be most effective, wearing a mask should be combined with other important protective measures such as getting vaccinated, staying home when sick, and regularly practicing hand hygiene. Masks are most effective when fitted, worn and handled correctly.

Schools can support those who choose to wear a mask, including:

- Promoting a supportive school environment for mask wearing through mask-specific messaging, including at assemblies, in announcements, signs, and written communications. Include that some people wear masks to reduce risk of communicable disease and it is important to be respectful of other's choices. Include evidence-based, trusted information on masks from [BCCDC](#).
- Continue school-wide efforts to create safe and inclusive learning environments free from discrimination, bullying and harassment. Set, communicate and consistently reinforce clear expectations that bullying and disrespectful behaviour and conduct related to personal mask use is unacceptable. Address behaviour in line with protocols and practices (e.g. student code of conduct).

### PERSONAL SPACE

Staff and students should be encouraged to respect others personal space (the distance from which a person feels comfortable being next to another person).

## FOOD SAFETY

### *BCCDC Guidance*

Schools that provide food services under the [Food Premises Regulation](#) should adhere to the required measures (e.g. a FOODSAFE trained staff member a food safety plan, etc.) For special events or sites requiring food permits, please consult your local health authority environmental health officer.

Staff, students, or other persons in the school setting should follow routine food safety practices, including diligent hand hygiene. More information may be found on the [BCCDC Food Safety webpage](#).

Staff and students should be encouraged to not share items that come in contact with the mouth (e.g., food, drinks, unwashed utensils, cigarettes, vaping devices). Shared-use items that touch the mouth should be cleaned and disinfected between use by different individuals (e.g., water bottles, instrument mouth pieces).

## Section 3: Administrator Protocols for Managing Communicable Disease Activity at School

### *BCCDC Guidance*

Most communicable diseases experienced by students and staff within school settings can be managed by the individual/family and through routine preventative measures, such as staying home from school until well enough to participate in regular activities. Information resources are available to support management of routine communicable diseases, including [HealthLink BC](#), the [BCCDC Guide to Common Childhood Diseases](#), and other school health resources hosted on health authority webpages ([Vancouver Coastal Health](#); [Fraser Health](#); [Interior Health](#); [Island Health](#); [Northern Health](#)).

Public health works closely with education partners to support the health and wellbeing of students and staff in school settings. Public health may become directly involved if certain reportable diseases, such as measles, are identified where there are effective interventions available to prevent further spread and protect against severe disease. Additional time-limited public health measures may also be implemented at the discretion of the Medical Health Officer or the Provincial Health Officer in response to broader risk of communicable disease transmission in the community.

School or district administrators can contact public health if they have concerns about communicable disease transmission within the school setting and require additional support.

### Communications and Protecting Personal Privacy

Medical Health Officers play the lead role in determining if, when and how to communicate information regarding increased communicable disease activity within a school.

Schools are encouraged to routinely communicate to their school community the need to practice health awareness, and to stay home when sick. This should include following public health measures, if in place.

To protect personal privacy and to support accuracy, schools should exercise caution in providing communicable disease notifications beyond when they are recommended by public health.

### Functional Closures

A functional closure of a school is the temporary closure of a school determined by a school district or independent school authority due to a lack of staff to provide the required level of teaching, supervision, support, and/or custodial to ensure the health and safety of students. This would likely be due to a high number of staff or certain employees away who are required for a school to function, and the inability to temporarily replace them. School districts (or independent schools) should notify their Medical Health Officer and the Ministry of Education and Child Care ([erases@gov.bc.ca](mailto:erases@gov.bc.ca)) when they are considering or implementing a functional closure.

### Public Health Closure

A public health closure is the temporary closing of a school ordered by a Medical Health Officer when they determine it is necessary to prevent the excessive transmission of a communicable disease.

## Section 4: Key Contacts, Additional Resources & Links

- Board of education questions regarding collective agreements or employment related matters can be directed to the [BC Public School Employers' Association](#)
