

David Stoddart School

February 2024

Principal's Message

Dear Parents,

We are officially in the middle of the 2023-2024 academic year if you can believe it. Semester 2 officially began February 1st and the grade 10-12 students will be receiving their Semester 1 reports on Feb 8th.

After experiencing some unusually warm weather in December it certainly swung the other way fast. We recognize not having the bus operational for a few days has been a major inconvenience and thank you for all the efforts you have made to get kids to school.

It is a good possibility temperatures will drop significantly again this month so we will be prepared for potential indoor days.

There are a lot of fun things in store for the rest of the year. One of them happened this week where we got a visit from a NASA funded research team with individuals from Dartmouth and John Hopkins University who have been studying nearby lakes noting the unique mineral properties, which closely resemble lake beds on Mars. They approached us about interacting with the kids and doing some presentations on their work and we were all more than happy to accept.

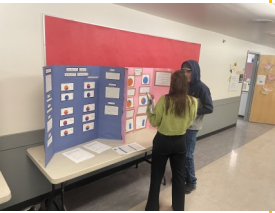

Thank you all again for your tremendous support.
