

David Stoddart Classroom Snapshot

2021/2022

Our Grade 8/9 Applied skills class has been learning the basics of photography. Many projects have led them outside to enjoy the fall in all its color. There has been some amazing portraits taken over the last two months and many skills honed. They will now be using photoshop to create an original photo composite.

Our grade 2/3/4 class started out by researching their name. What is the meaning of your name? Were you named after a family member, famous person or someone special? From there the students researched their family tree and created a family tree with all its branches and leaves.

Zones or Regulation

How are you feeling today? Are you tired, happy, sad, grumpy, mad, confused or excited? These are all feelings we experience on a day to day basis. How do we keep ourselves regulated so that we keep ourselves in the green zone. What strategies can we use to take us from the red, yellow or blue zone and put us back in the green zone?
